For our location in **Bruchsal** – with a start date as soon as possible – we are looking for a

Project Manager for Software Development in the Field of Image Processing (f/m/x)

Your tasks:

- As a project manager, you will lead and design innovative and varied software developments for the transport and logistics industry.
- You will accompany projects with our customers from the initial idea to the handover and will be responsible for creating schedules and prioritising.
- You will be very familiar with our portfolio of AI, mobile, front-end and back-end technologies, right through to hardware solutions.
- You will design the framework for a project team made up of highly qualified employees and lead the team in a way that harnesses its potential in a committed and effective way.
- In addition to working with external partners, you will build up long-term customer relationships.

Your profile:

- You have a degree in Business Informatics or Computer Science, or have completed comparable training with relevant professional experience.
- Ideally, you have already gathered experience as a developer in software or electronics projects.
- You have a very good technical and a good business understanding.
- You have both experience in agile development (Scrum, Gantt charts) and knowledge of the corresponding tools (Jira, Confluence, Taiga or similar).
- You ideally have basic programming skills (C++, Python).
- You are able to understand problems that arise in development and work out solutions independently with your team.
- You are determined, have a good sense of customer value, good people skills, a structured and methodical approach and you can bring even complex projects to a successful conclusion and shape framework conditions.

Do you have an analytical mind and can work independently? Are you a customer-oriented, open and communicative person? Then you're a perfect fit for our committed team of supportive colleagues with its wealth of development opportunities.

You can look forward to exciting and varied tasks. In addition to an attractive salary, you can also enjoy flexible working hours that offer you enough flexibility to maintain a good work-life balance.

Have we caught your interest? Then send us your complete application documents by email to Mr Thomas Harder, stating your earliest starting date and your salary expectations.
